Contents

PART 1

i Editorial
1 Proton extrusion in seed coats of *Phaseolus vulgaris* L.
A. J. E. Van Bel & J. W. Patrick
7 An analysis of resistance to water flow through wheat and tall fescue leaves during pressure chamber efflux experiments
R. L. Stroshine, R. H. Rand, J. R. Cooke, J. M. Cutler & J. F. Chabot
19 Isolation and activity of the photodynamic pigment hypericin
J. P. Knox & A. D. Dodge
27 Specific action of blue light on phytochrome-mediated enzyme syntheses in the shoot of milo (*Sorghum vulgare* Pers.)
R. Oelmüller & H. Mohr
33 The influence of chlorophyll fluorescence on the light gradients and the phytochrome state in a green model leaf under natural conditions
W. Lork & L. Fukshansky
41 Comparison of chlorophyll fluorescence emission characteristics of wheat leaf tissue and isolated thylakoids as a function of excitation wavelength
M. P. Percival & N. R. Baker
49 Comparison between two methods of generating pressure-volume curves
G. A. Ritchie & J. R. Roden
55 Effect of boundary layer conductance on the response of stomata to humidity: short communication
J. A. Bunce
59 Relationship between the activity of the orotic acid pathway and glucose content of roots of *Cucurbita pepo:* short communication
C. J. Lovatt
65 Ultrastructure of wheat coleoptile mitochondria at short-term anoxia and post-anoxia: short communication
B. B. Vartapetian, N. A. Zakhmylova & I. P. Generozova
69 Book reviews
73 Corrigenda
73 Erratum

PART 2

75 An heuristic hypothesis of chilling injury in plants: a role for calcium as the primary physiological transducer of injury: opinion
P. V. Minorsky
95 Partitioning stomatal and non-stomatal limitations to photosynthesis: opinion
C. E. Jones
105 Regulation of nitrate uptake into *Chara corallina* cells via NH_4^+ stimulation of NO_3^- efflux
C. E. Deane-Drummond
111 Regulation of the loss of frost hardiness in *Pinus radiata* by photoperiod and temperature
D. H. Greer & C. J. Stanley
117 The dual role of oxygen in avocado fruit respiration: kinetic analysis and computer modelling of diffusion-affected respiratory oxygen isotherms
M. L. Tucker & G. G. Laties
129 Effects of weak acids on proline accumulation in barley leaves: a comparison between abscisic acid and isobutyric acid
P. Pesci & N. Beffagna
135 Chilling injury in coleus as influenced by photosynthetically active radiation, temperature and abscisic acid pretreatment. I. Morphological and physiological responses
D. T. Krizek, P. Semeniuk, H. E. Moline, R. M. Mirecki & J. A. Abbott
143 Effects of seismic stress on the vegetative growth of *Glycine max* (L.) Merr. cv. Wells II
T. Pappas & C. A. Mitchell
149 A procedure for isolating vacuoles from leaves of the halophyte *Suaeda maritima*
M. N. H. Dracup & H. Greenway
155 Germination and seedling growth of cotton: salinity-calcium interactions: short communication
L. M. Kent & A. Läuchli
161 Comparative evaluation of photoionization and flame ionization detectors for ethylene analysis: technical report
P. K. Bassi & M. S. Spencer
167 Book reviews

PART 3

171 Correspondence
173 Cell–cell communication in the leaves of *Commelina cyanea* and other plants
M. G. Erwee, P. B. Goodwin & A. J. E. van Bel
179 A study of the impaired growth of roots of *Zea mays* seedlings at low oxygen concentrations
B. J. Atwell, C. J. Thomson, H. Greenway, G. Ward & I. Waters
189 The effect of short-term H_2S fumigation on water-soluble sulphydryl and glutathione levels in spinach
L. J. De Kok, W. Bosma, F. M. Maas & P. J. C. Kuiper

195 Effect of water stress on the enzymes of nitrogen metabolism in mung bean (*Vigna radiata* Wilczeck) nodules
A. Kaur, I. S. Sheoran & R. Singh

201 Some observations on the spectral distribution characteristics of short-wave radiation within *Pinus radiata* D. Don canopies
D. C. Morgan, I. J. Warrington & D. A. Rook

207 Diurnal cycles of leaf extension in unsalinized and salinized *Beta vulgaris*
L. J. Waldron, N. Terry & J. A. Nemson

213 The effect of nutrients on adenine nucleotide levels and the adenylate energy charge ratio in *Spartina alterniflora* and *Spartina patens*: short communication
I. A. Mendelssohn & K. L. McKee

219 Morphological and physiological changes in black alder induced by water stress: short communication
J. R. Seiler

223 A simple method for determining the boundary layer resistance in leaf cuvettes: technical report
K. J. Parkinson

227 Book reviews

PART 4

231 The effect of xanthoxylin (2-oxy, 4-6-dimethoxyacetophenone) on potassium-dependent acid extrusion in wheat and maize root segments
M. Bellando, G. Alloatti, G. Romani & M. T. Marré

235 Sodium fluxes in corn roots: comparison to Cl and K fluxes, and to Na-fluxes in barley
B. Jacoby & B. Rudich

239 Phloem sap exudation in *Ricinus communis*: elastic responses and anatomical implications
J. Kallarackal & J. A. Milburn

247 A model of drop size distribution for a system with evaporation
P. Brain & D. R. Butler

253 Peroxidase involvement in lignification in water-impermeable seed coats of weedy leguminous and malvaceous species
G. H. Egley, R. N. Paul, Jr, S. O. Duke & K. C. Vaughn

261 Salt tolerance in the halophyte *Suaeda maritima* (L.) Dum. The influence of the salinity of the culture solution on leaf starch and phosphate content
M. A. Hajibagheri & T. J. Flowers

269 Stomatal mechanics. III. Geometric interpretation of the mechanical advantage
H. Wu, P. J. H. Sharpe & R. D. Spence

275 Loading of assimilates in wheat leaves. II. The path from chloroplast to vein
D. P. Altus & M. J. Canny

287 Relationship of dehydration rate to drought avoidance, dehydration tolerance and dehydration avoidance of cabbage leaves, and to their acclimation during drought-induced water stress
J. Levitt

297 Book reviews

PART 5

303 Enzyme patterns in energy metabolism during flower induction in spinach leaves
M. Bonzon, R. Degli Agosti, E. Wagner & H. Greppin

309 Measurement of free space and sorption of large molecules by cereal roots
M. G. T. Shone & A. V. Flood

317 Water velocity, growth-form and diffusion resistances to photosynthetic CO_2 uptake in aquatic bryophytes
Janet T. Jenkins & M. C. F. Proctor

325 The effect of temperature and ageing on root apical meristems during seedling growth of *Triticum aestivum* L.: a specific effect on nucleoli
E. G. Jordan, P. J. Cooper, G. Martini, M. D. Bennett & R. B. Flavell

333 Extraorgan freezing in wintering flower buds of *Cornus officinalis* Sieb. et Zucc.
Masaya Ishikawa & Akira Sakai

339 Nutrient-mediated shift in temporal expression of phytochrome controlled β-amylase synthesis in mustard (*Sinapis alba* L.) cotyledons
V. A. Manga & R. Sharma

345 Photosynthetic characteristics of *Lactuca serriola* L.
K. S. Werk & J. Ehleringer

351 Auxin action: the search for the receptor
J. W. Cross

361 The influence of temperature during seed development on the germination characteristics of millet seeds: short communication
H. A. Mohamed, J. A. Clark & C. K. Ong

363 Leaf hygrometer *v.* pressure chamber: a comparison of pressure-volume curve data obtained on single leaves by alternating measurements: technical report
S. B. Kikuta, E. Kyriakopoulos & H. Richter

369 Book reviews

PART 6

371 Possible effects of rising CO_2 on climate
A. J. Crane

381 Carbon dioxide increase: the implications at the ecosystem level
H. H. Shugart & W. R. Emanuel

387 Physical, chemical and biological characteristics of CO_2 gas flux across the air–water interface
S. V. Smith

399 Diffusion of inorganic carbon across an unstirred layer: a simplified quantitative approach
R. J. Helder

409 Exchange of carbon dioxide between vegetation and the atmosphere
B. J. Legg

417 Uptake of CO_2 by aquatic vegetation
J. A. Raven, B. A. Osborne & A. M. Johnston

427 The respiratory source of CO_2
J. F. Farrar

439 Chlorophyll *a* fluorescence: can it shed light on fundamental questions in photosynthetic carbon dioxide fixation?
M. N. Sivak & D. A. Walker

449 CO_2 uptake and transport in leaf mesophyll cells
B. Colman & G. S. Espie

459 CO_2 and intracellular pH
A. W. Bown

467 Sensitivity of stomata and water use efficiency to high CO_2
J. I. L. Morison

PART 7

475 Penetration of light into soil and its role in the control of seed germination
D. Bliss & H. Smith

485 Dynamic model of the response of a vegetative grass crop to light, temperature and nitrogen
I. R. Johnson & J. H. M. Thornley

501 Freezing avoidance in Andean giant rosette plants
F. Rada, G. Goldstein, A. Azocar & F. Meinzer

509 Transmission properties of an oak canopy in relation to photoperception
J. E. Hughes, D. C. Morgan & C. R. Black

517 Characteristics of nitrate uptake into seedlings of pea (*Pisum sativum* L. cv. Feltham First). Changes in net NO_3^- uptake following inoculation with *Rhizobium* and growth in low nitrate concentrations
C. E. Deane-Drummond & N. J. Chaffey

525 The electrogenic proton pumping from parenchyma symplast into xylem—direct demonstration by xylem perfusion: short communication
A. Mizuno, H. Kojima, K. Katou & H. Okamoto

531 HCO_3^- uptake through the roots and its effect on the productivity of willow cuttings: short communication
E. M. Vapaavuori & P. Pelkonen

535 A method for controlling the within-root CO_2 concentration: technical report
B. J. Good

539 Evaluation of a technique for the measurement of chlorophyll fluorescence from leaves exposed to continuous white light: technical report
E. Ögren & N. R. Baker

549 Book reviews

PART 8

557 Differences in seed longevity at the species level: mini-review
D. A. Priestley, V. I. Cullinan & J. Wolfe

563 Cell wall elasticity: I. A critique of the bulk elastic modulus approach and an analysis using polymer elastic principles: theoretical paper
H.-I. Wu, R. D. Spence, P. J. H. Sharpe, J. D. Goeschl

571 The effect of genotype and environment on the fatty acid content of barley (*Hordeum vulgare* L.) grains
W. De Man

579 The role of electrogenic xylem pumps in K^+ absorption from the xylem of *Vigna unguiculata*: the effects of auxin and fusicoccin
A. H. De Boer, K. Katou, A. Mizuno, H. Kojima & H. Okamoto

587 Xylem perfusion of tap root segments of *Plantago maritima*: the physiological significance of electrogenic xylem pumps
A. H. de Boer & H. B. A. Prins

595 High-resolution measurement of growth during first positive phototropism in maize
T. I. Baskin, M. Iino, P. B. Green & W. R. Briggs

605 Biphasic fluence-response curves for light induced germination of *Arabidopsis thaliana* seeds
J. W. Cone, P. A. P. M. Jaspers & R. E. Kendrick

613 Phase and amplitude relations between transpiration, water potential and stem shrinkage
E. B. Wronski, J. W. Holmes & N. C. Turner

623 The effect of high levels of carbon dioxide on dark respiration and growth of plants: short communication
J. Reuveni & J. Gale

629 Book reviews

PART 9

631 Physical, chemical and spectral properties of leaf surfaces of *Berberis aquifolium* (Pursh.)
V. S. Berg

639 A dynamic model for photosynthesis by an aquatic plant, *Egeria densa*
W. A. Laing & J. Browse
651 Chloroplast-ultrastructure and chlorophyll content in leaves from *Quercus* branches with and without epiphytic lichen thalli
C. Ascaso & S. Rapsch
657 Changes in ion and water content of individual shoot organs in a salt-tolerant and a salt-sensitive clone of *Agrostis stolonifera* L. during and subsequent to treatment with sodium chloride
M. J. Hodson, H. Öpik & S. J. Wainwright
669 Loading and translocation of assimilate in the fine veins of sunflower leaves
X.-D. Wang & M. J. Canny
687 NaCl effects on 4-desmethylsterol composition of plasma-membrane-enriched preparations from citrus roots
T. J. Douglas
693 Phospholipid, galactolipid and free sterol composition of fibrous roots from citrus genotypes differing in chloride exclusion ability
T. J. Douglas & S. R. Sykes
701 Seasonal relationships between leaf nitrogen content (photosynthetic capacity) and leaf canopy light exposure in peach (*Prunus persica*)
T. M. DeJong & J. F. Doyle
707 Seed germination in *Chenopodium album* L.: further evidence for the dependence of the effects of growth regulators on nitrate availability
H. S. Saini, P. K. Bassi & M. S. Spencer
713 The nitrogen balance of *Raphanus sativus* × *raphanistrum* plants. I. Daily nitrogen use under high nitrate supply
E.-D. Schulze, G. Koch, F. Percival, H. A. Mooney & C. Chu
721 Effects of Cr on proton extrusion, potassium uptake and transmembrane electric potential in maize root segments
P. Zaccheo, M. Cocucci & S. Cocucci
727 Determination of orchid seed viability using fluorescein diacetate: technical report
H. W. Pritchard
731 Instructions to contributors
